## No to fees and cuts - taking on the Tory assault

The Tories have unleashed the biggest assault on ordinary people for generations. Whilst we have already seen inspiring resistance to their attacks, I am determined that we take the fight on to the next level. We need an active, campaigning union. Elect me and I will:

- Organise and build a first term national demo for free education, against all cuts and the destruction of the welfare state
- Work with activists on FE and HE campuses to support direct action and walk-outs
- Actively support our lecturers, teachers and the wider labour movement in their strikes and industrial action to defend jobs and public services
- Ensure NUS is at the heart of the progressive alliance we need to stop the Tories

## Challenge racism and bigotry - unite against fascism

David Cameron claims that multiculturalism is dead. The fascist BNP got over 1 million votes at the last general election. The EDL are organising dozens of anti-Muslim 'protests' across Britain. NUS must be at the forefront of the progressive majority to take on this growing reactionary tide of bigotry. Campaigning for equality and liberation must be at the heart of our agenda. Elect me and I will:

- Mobilise thousands of students to Unite Against Fascism demos and events to actively oppose the English Defence League and British National Party
- Defend NUS' No Platform policy and help you to get policies passed in your unions
- Help you to organise One Campus Many Cultures, Love Music Hate Racism and Love Music Hate Homophobia events on your campuses
- Demand NUS prioritises Black History Month, LGBT History Month and fully resources all four of the Liberation Campaigns

## International peace and justice - no to war and climate chaos

We live in revolutionary times - from the Middle East to Latin America ordinary people are leading the way and showing that another world is possible. But the continuing aggression and colonial aspirations of the West and environmental catastrophes also makes these dangerous times for billions of people across the world. I stand for:

- No Iraq in Libya - don't buy the No Fly Zone, No to any Western intervention
- Peace & justice in the Middle East: end the siege on Gaza, troops out of Afghanistan!
- Power to the people - support the revolutions in Egypt, Tunisia & across the region
- Serious action to stop climate change - stop destroying the planet for profit!
