

Luke Harman for Block of 15

Mobilise the Student Vote

We're all very aware that the General Election is just around the corner. Previously students and young people have been seen as the easy target as we don't vote.

I will ensure that NUS leads national and local campaigns to get students and young people registered to vote and educate them about why voting is essential.

Education that Works for Students

Too many students come into education not knowing what it is they want to progress onto, or get talked into doing courses that don't suite their needs. We need an education system that allows people to do the course that suites their needs and desires.

I will work with the further and higher education zones to ensure that we are campaigning for education that works for students and allows them to progress.

Student Voice That Speaks

Student voice has been seen as that fashionable tick box that make institutions look good. Effective Student Voice gives students ownership of their own educations and allows them to make the changes that they want to see.

I will support the FE Zone's policy to get students more involved in college inspections and campaign to get education inspectors to pay more attention to Student Voice.

"Luke is the type of officer that has led me to get more involved in campaigns and into my students' union, right from the day i met him, he has shown passion and dedication to representing students and making sure we get a better deal."

Miki Vyse, President - Leeds Trinity Students' Union
